

Environment, Health & Safety (EHS)

EHS Objectives

- Protect the health, safety and welfare of all who take part in our activities, by reducing the risk of occupational illnesses and incidents on site.
- Ensure all our activities **as a minimum** comply with local applicable Health, Safety and Environment laws and regulations.
- Continuously monitor and improve our health, safety and environmental performance.
- Minimise our impact and where possible, have a positive impact on our environment.
- Promote sustainable business practices across the company.
- Ensure transparency in communicating business goals, history, performance and operations.

As a world renowned technology leader for innovative and cutting edge products and services,

Moog actively commits to achieving the same level of excellence in the field of environment, health & safety. Supported by the unique values derived from the Moog culture and philosophy we strive to promote a sustainable and transparent management system that enables Moog to have a positive impact on its people, environment and stakeholders.

Our Unique Culture & Philosophy promotes an environment that empowers and inspires individuals to achieve remarkable things - for our customers, for the company and for each other. It is the values by which we conduct our business that ensures Moog continues to be a great place to work.

A Safety Culture within the business is prominent and will continue to develop and improve. Our set objectives focus our efforts to continually improve and provide:-

- A positive, pleasant and safe environment for ALL our employees, visitors and contractors that is compliant with all local applicable EHS laws and regulations and in line with our corporate business expectations.
- Clean, maintained and reliable facilities
- Products and operations required to produce them take EHS into account throughout their life cycle and processes.

Environmental & Safety Champions assist in driving our EHS goals, with initiatives being steered by a dedicated cross-functional management committee. This proven structure combined with commitment from our senior leaders ensures Moog continues to achieve ISO14001:2015 and HSG65 standards across the business.

Proactive Leadership at Moog encourages and promotes development of sustainable business practices that allows Moog to grow and develop, meeting today business needs without compromising the needs of our future business.

Therefore,

Every Director is **personally committed** to actively promoting and implementing this policy throughout the business, community and stakeholder groups.

Every Manager, at every level, will encourage their staff to actively implement EHS initiatives and programmes within their activities and ensure they remain informed and play an active role in contributing to EHS development.

Every Employee proactively seeks to maintain a safe and positive working environment whilst minimising their impact on the environment within the scope of the activities they undertake.
